

HIKVISION

The DS-1005KI keyboard is a unit designed to control functions of security cameras and video surveillance software, such as zoom, focus, PTZ control, window switching, screenshots, video recording, etc. The device is to be connected with a Hikvision DVR/NVR or a PC via **USB interface**. The control functions are performed with the use of 15 programmable buttons and joystick allowing 3D PTZ control, rotating zoom, and additional actions (with two buttons).
