

Key features

- Can be installed on flat or sloping rooftops
- Universal, easy to install
- Ideal for mounting DVB-T, WiFi/WLAN antennas

The UMA-50R100 [209-307](#) antenna mast with adjustable base is dedicated for mounting television, radio or Wi-Fi antennas on flat or sloping rooftops, without using any ballast.

The elements are made of galvanized steel. The height of the mast is 1030 mm, the diameter is 50 mm. A plastic cap prevents water from entering the interior of the tube.
