

Datasheet 1/4

# BASE008 A/B

## Unity Gain Omni Base Station Antenna for 850 MHz band

This meticulously constructed base station antenna with integrated multipurpose mounting bracket comes with a generous bandwidth which reduces the need for multiple antennas both in stock and on installation sites.

- High power antenna design
- No groundplane needed

| Electrical Specificati   | ons:                                               |  |
|--------------------------|----------------------------------------------------|--|
| Frequency                | 790 - 862 MHz, 872 - 960 MHz (A/B)                 |  |
| Bandwidth                | A: 72 MHz, B: 88 MHz                               |  |
| Antenna Type             | Half Wave Dipole                                   |  |
| Impedance                | 50 ohm                                             |  |
| VSWR                     | < 1.5:1                                            |  |
| Polarisation             | Vertical                                           |  |
| Gain                     | 0 dBd, 2.1 dBi                                     |  |
| Radiation Pattern        | Omni Directional (Horizontal)                      |  |
| Half Power<br>Beamwidth  | 78°                                                |  |
| Electrical Beam-tilt     | 0°                                                 |  |
| Max. Input Power         | 100 W                                              |  |
| Antistatic<br>Protection | Direct Ground                                      |  |
| Mechanical Specific      | ations:                                            |  |
| Color                    | White, Black and Orange                            |  |
| Length                   | See Outline Drawing                                |  |
| Weight                   | Max. 0.89 kg                                       |  |
| Mount type               | Fixed Tube Mounting Bracket                        |  |
| Mounting place           | On vertical or horizontal mast tube (Ø 30 - 60 mm) |  |
| Materials                | Brass, Copper, Fibreglass and Aluminium            |  |
| Survival Wind<br>Speed   | 55 m/s                                             |  |
| Operating temperature    | -55C to +70C (IEC 60068-2-1, IEC 60068-2-2)        |  |
|                          |                                                    |  |
