

**N.1 portable
CB in the
world!!**

MODEL

ALAN 42DS

CODE

C1267

Midland introduces the new version of the well-known ALAN 42, the most popular compact handheld CB transceiver: **ALAN 42DS** (Digital Squelch). Re-designed in its electronics to considerably improve the audio quality, ALAN 42DS is equipped with **digital squelch, ANL and noise blanker filters**, able to eliminate the annoying noises coming from the vehicle or external sources so that the desired signal won't be affected.

ALAN 42DS has the same functions of Alan 42: it is a **multistandard** equipment that allows to select any European frequency band and therefore can operate in all EU countries.

The **digital squelch** is the automatic adjustment of the squelch and automatically activates depending on the incoming signal; while the **Noise Blanker and ANL filters** improve the **audio quality and make your conversations clearer**, by eliminating noises coming from external sources or from the vehicle, such as for example the car ignition noise.

ALAN 42DS is equipped with many features, amongst which we point out the **EMG** function to immediately select the emergency channel, **the selectable high or low output power (4W/1W)**, SCAN and Dual Watch.

COMPLYING TO 2014/53/EU

The package includes
